

# ELEPHANT

AUTOMATIC PLANT TO PRODUCE PREFABRICATED LINTEL IN PRESTRESSED CONCRETE WITH EDGE IN FIRED CLAY

Elephant represents the "State of Art" of the industrial facilities designed to produce prestressed concrete lintels with clay-bricks. The system includes the patented "Elephant" pulling, cutting and packaging device designed to provide packed and stacked lintels without any need of manual operation. Elephant can reach massive output capacity with a reduced crew. High quality products are produced thanks to high sophisticated dosing, compacting and cutting devices.
